HBS upgrade at Heathrow Terminal 1 completed by Siemens

Siemens Logistic and Airport Solutions has successfully delivered all 14 phases of the Baggage and Controls System installation as part of the Hold Baggage Screening (HBS) upgrade at Heathrow Terminal 1. The upgrade to meet with DfT compliance and extend the operational life of the system will provide improved maintainability, operational flexibility and additional baggage handling capacity.

Project Manager, Pablo Ugalde explained that the extensive installation work, which lasted over period of 24 months, had been carried out by the team from Siemens across several control areas of the existing baggage hall while maintaining full operation capability of the ‘Live’ baggage system. The newly installed baggage system incorporates nine ‘Level 1/2’ and three ‘Level 3/4’ HBS lines and an additional 2 reclaim carousels.

Siemens has demonstrated over many years its logistic expertise and operational support to some of the world’s busiest international airports. From Beijing to Madrid, the company has a proven track record for the operation and maintenance of a number of complex baggage handling systems and the technical capacity to integrate and improve systems and technology.

In addition to the completion of new baggage handling facilities and IT systems at Heathrow’s Terminal 4 last year and the on-going installation of baggage equipment at the newly constructed Heathrow Terminal 2, the company’s activities have taken a significant upturn recently in terms of providing the UK based operators of leading international transport hubs and regional airports with operational, service and technical support. In turn, the number of employees in the Logistics and Airport Solutions business has also increased significantly.
Siemens was established in the United Kingdom 170 years ago and now employs around 13,520 people in the UK. Last year’s revenues were £3.2 billion*. As a leading global engineering and technology services company, Siemens provides innovative solutions to help tackle the world’s major challenges, across the key sectors of energy, industry, infrastructure & cities and healthcare. Siemens has offices and factories throughout the UK, with its headquarters in Frimley, Surrey. The company’s global headquarters is in Munich, Germany. Siemens Logistics and Airport Solutions

Siemens Logistics and Airport Solutions in the United Kingdom is headed by Dr. Andrew Robinson (Managing Director) and Steve Hayward (Finance Director). The company serves essentially two large groups of customers: airports/airlines and postal services. For airports and airlines, Siemens Logistics and Airport Solutions provides baggage and cargo handling lines. For postal, courier, express and parcel service providers, the company offers a range of letter and parcel sorting machines as well as address reading and coding solutions. The non-segment-specific software solutions as well as the comprehensive services provided by Siemens Logistics and Airport Solutions are equally attractive.
