Siemens supports annual traffic technology event

The annual JCT Traffic Signal Symposium and Exhibition at the University of Hertfordshire this week will once again feature a comprehensive display of Siemens' latest product developments plus two presentations by key speakers representing the company. The papers will be delivered by Head of Product Management, Keith Manston, judged best speaker at last year's event, and Nick Rule on behalf of Design Services.

The event takes place over 2 days: Wednesday 15th and Thursday 16th September 2010 with a Gala Dinner on Wednesday sponsored by Siemens. On day one, Session 1 at 9.30am, Keith Manston's paper *Advanced Wireless Communications for UTC* will focus on a detailed trail in Southampton by Siemens and the City's authority to establish the suitability of using 3G networks as a communication option for SCOOT UTC.

At 2pm (Session 3), Nick Rule's presentation *LRT and MOVA* will concentrate on a recent project to introduce MOVA control at various sites on a Light Rail Transit (LRT) network. This builds and expands on the company's considerable expertise in the field of validation work.

The company's exhibition stand displays its Design Services capabilities, newly developed technology and innovative solutions including SafeZone, Siemens' new average speed enforcement system specifically designed for urban environments. Siemens will also showcase its highly successful portfolio of Extra Low Voltage (ELV) equipment and LED retrofit technology.

The company will also be represented at the following forthcoming events:

- UK Road Strategy 2010, 29th September 2010, QEIIICC, Westminster, London
- Siemens User Groups, 19th and 20th October 2010, The Wessex Hotel, Bournemouth
- Road Expo Scotland, 3rd and 4th November 2010, Royal Highland Centre, Edinburgh
- Road Safety Expo 2010, 25th November 2010, QEIIICC, Westminster, London
